

## Prerequisites

Laptop must be connected to the internet via WiFi or a wired connection

Your LAN credentials

Your Yubikey

## IMPORTANT

Before you logoff your laptop or reboot it, you must disconnect from the VPN first.

Not doing so has caused sign-in issues for other users.

## Step 1

**Insert** your Yubikey into one of your laptop's USB ports

## Step 2

**Launch** Cisco AnyConnect from your Windows Toolbar

## Step 3

From the dropdown menu **select** either:

eMedNY\_Centrify\_01

eMedNY\_Centrify\_02

Then select **Connect**

## Step 4

In the pop-up window enter the credentials you use to log into your computer

## Step 5

In the next pop-up window, make the password field active by clicking inside of it

Using your finger, gently press the brass Y on the Yubikey down

The password field will populate and connect

## TROUBLESHOOTING

1

Check to make sure you have good connection to the internet (ie: speedtest.net)

2

If you are unable to log into eMedNY\_Centrify\_01 attempt eMedNY\_Centrify\_02 or vice versa

3

If all else fails contact your Team Lead, Supervisor, or Manager
